SUMMARY

I am a graduate of a vocational high school specializing in Computer Networking and Telecommunications. From my experience at vocational school, I have developed the ability to work in a team, maintain time discipline, and have good physical endurance. In addition, I am accustomed to working under pressure and am able to follow instructions in detail. I have a strong desire to learn and am able to work independently or in a team. My educational background has shaped my discipline and perseverance, which I use as a foundation to continue to develop in the world of work. My goal is to build my career gradually by giving my best contribution and continuing to improve myself professionally.
